

#### **1.4. Objectives and Approach for the Annual Plan 2007-08**

**1.4.1.** The objective of the Annual Plan 2007-08, apart from high growth, is to ensure that a greater share of the benefits of growth reach the poor and weaker sections of the State. Dependence of population on Agriculture even in the Services - dominated economy of the State is quite large. The success of the 11<sup>th</sup> Plan will greatly depend on our ability to revitalize the agricultural sector. The Annual Plan 2007-08 will kick start the 11<sup>th</sup> plan with this objective. It also lays special emphasis on the improvement of the infrastructure in the State. The State is committed to the objective of achieving economic growth within a framework of social justice.
